Motivated and Dynamic Web Developer

I'm a passionate and adaptable web developer with experience in full-stack development and a strong interest in creating user-friendly applications. My work in web development has given me a broad foundation in both frontend and backend development , along with design skills that help me create visually appealing and highly functional layouts. I enjoy tackling challenges head-on, solving complex problems, and working through creative solutions that improve user experience.

In addition to my technical skills, I'm committed to collaborating effectively with others and contributing to a positive team environment. My background in project management has honed my ability to see projects through from start to finish, ensuring quality at each step. I'm excited to keep growing in this field, learning from others, and bringing my own unique perspective to each new project.

Core Competencies:

- Software Development

Education:

- **Bachelor of Science in Software Engineering** | Jimma University
- **Full stack web development |** Evangadi Networks

Projects:

At Evangadi Tech, I've been immersed in hands-on web development training, working on practical projects that have given me a well-rounded foundation in both frontend and backend development. My time here has allowed me to grow my technical skills, collaborate with a supportive team, and build applications that focus on smooth functionality and user experience.

- **Evangadi Forum**
  As part of a collaborative team, I helped develop the Evangadi Forum, a community-focused platform for questions and answers. Working alongside other developers, I contributed to building out both frontend and backend features, creating an interactive experience where users can connect, share knowledge, and engage in meaningful discussions.

- **Netflix Clone**
  Inspired by Netflix, I created a streaming application with a sleek design and smooth navigation. This project allowed me to delve into user interface design, API integration, and data handling, all aimed at delivering a seamless user experience.

- **Amazon Clone**
  For this project, I built a simplified e-commerce platform inspired by Amazon, featuring essential functionalities like product listings, user login, and a shopping cart. This involved backend API integration and database management, ensuring a responsive and reliable experience for users.

- **Apple Homepage Clone**
  I designed a replica of the Apple homepage, focusing on high-quality visuals, responsive layout, and modern styling. This project helped me refine my frontend skills, paying close attention to detail and user interface aesthetics.

Technical Skills: JavaScript | HTML | CSS | React | Node.js | Bootstrap | Express | MySQL | GitHub | Adobe Illustrator | VS Code
